PROJECTS

[Kalpdrushti ↗](#)

Jan 2026 - Mar 2026

[Prestige vehicle ↗](#)

Aug 2025 - Dec 2025

this was our college group project in which we built the web application of a showroom in which user was able to check availability, book the ride, can get an email in which he got notified if there's something new in showroom or something unique, he was also able to prebook the car for himself by paying a particular amount to showroom because of some reason we were not able to host but the project is still on my github Id.
